AI Product Marketing & Growth Lead

Novamind Labs · Auckland, New Zealand · AI-native B2B SaaS, founding marketer

- Run the **entire marketing function solo** on AI agents I built with Claude Code and MCP: content, three executive voices, AI search (AEO and GEO), outbound, events and reporting.
- Own product marketing from scratch: category, positioning, messaging and ideal customer profile, tested with design partners.
- Lead the go-to-market launch: beachhead, sequencing, launch surfaces and the first 90-day demand generation plan.
- Built the brand and the website as one system, with a source behind every public claim.

Jun 2025 – Apr 2026

Senior Marketing Manager

Ipiphany AI · Auckland, New Zealand · B2B SaaS entering a new category

- Built the demand generation and account-based marketing (ABM) engine from zero: LinkedIn and Google Ads, outbound through Apollo and HeyReach, SEO and content, run on weekly experiments tied to pipeline.
- Architected HubSpot CRM from scratch: lead scoring, lifecycle stages, attribution and the pipeline dashboards sales trusted.
- Automated brief to draft to publish with n8n and APIs across HubSpot, Apollo and HeyReach, cutting **content production effort by 70%+.**

Dec 2021 – Jun 2025

Sime Motors New Zealand · Auckland, New Zealand · multi-brand automotive group
